25 YEAR RE-REVIEW

#### 1. Purpose:

## A. Objective:

The SEACA network of radio	stations is to provide rapid and reliable
communications	in the Southeast tain tree and to actable
radio operational bases for the suppor	t of the various CIA antivities in the gree.
It will be one of the major links in the	he ring of staff radio hages
provided for in the Overseas Communica	tion Plan.

## B. Targets:

The base station will provide communications for staff circuits within a radius of approximately twenty-five hundred miles.

The base station will support agent circuits within a radius of approximately one thousand miles. Under favorable conditions contacts may be maintained over a distance of fifteen hundred miles.

This network will provide communications support for the sector between the Base and the proposed Base.

## 2. Requirements:

## A. Personnel:

Initially, approximately twenty-five personnel will be required to operate the network. Mobilization plans require approximately 250 personnel for the operation of the activity.

## B. Financial:

The following estimates have been established for the equipping, staffing, and operating of the network. These estimates include funds for the establishing of a major base station and up to ten substations in strategic locations throughout Southeast Asia.

Fiscal Year 1951
Fiscal Year 1952

Current Operations Full Mobilization

The financial estimates include personnel salaries, equipment costs, operating costs, and overhead expenses. The estimates for mobilization include funds for the constructing and equipping of a large radio base station whereas the current operations are conducted from transmitting and receiving stations
